- Manufacturing & Processing
- Infrastructure & Facilities

Service Type:

- Civil Engineering
- Structural Engineering
- Hydraulic Engineering
- Forensic Engineering
- Project Management
- Project Appraisal
- Construction Audit

Documents:

- Drawings
- Reports
- Certificates
- Audio Visual
- Maps
- Models

Walkway Platforms and Bridges that were destroyed during the severe bush fires devastated the National Park in 2020. The Rectification work was a requirement of the NSW National Parks & Wildlife Service. Inspections were carried out to ensure that the construction work complied with the design for the project.

The project consisted of 4 sections of walkway with a total length of 4km, a viewing Platform and a Boardwalk to minimize pedestrian damage to the existing vegetation.

The NSW National Parks & Wildlife Service was pleased with the services provided jointly by FTS and Enprocon to deliver the project on time and within budget.
